1) Street Zombies

Huge numbers of Street Zombies will suddenly take over the Park in the evening. They evolve into a great variety of zombies including Red Zombies covered in blood, Fat Zombies that are so enormous they don't appear human, and Carriers that spread their virus around them. The zombie virus will be spread by explosions throughout the Park, and people will turn into zombies right before your eyes. The Park will be filled with screams as guests are attacked by swarms of terrifying zombies that have never been seen before, as well as the threat of infection coming from all sides.

Moreover, this year will once again feature mobs of countless zombies that showcase masterful dancing on the streets when music starts playing. Guests can enjoy a bit of relief from the dire atmosphere in these spontaneous performances.

2) Alien vs. Predator (NEW)

Alien vs. Predator, a popular Hollywood film, was released in 2004 and featured a showdown between two species of creatures. Now, they appear at the Park for the first time. In a laboratory that has become an Alien den, guests are drawn into a battle between the cruel, inhuman Aliens and the ferocious, elusive Predators. During this fierce battle, the targets are transformed into hunters that are thoroughly focused on taking the guests' lives! This chilling attraction, which reproduces the movie at a stunning quality and scale, will allow guests to experience the despair of trying to escape and having nowhere to run.

3) A Nightmare on Elm Street (NEW)

A Nightmare on Elm Street is a 1984 movie about the cold-blooded Freddy, a murderer who attacks people in their dreams. Now, he appears at the Park for the first time. Guests will be drawn into a nightmarish world and have to escape from the threat of the cruel Freddy—who appears in unexpected places at unexpected times—in order to return to the real world. In this walk-through attraction, guests will be filled with fear and dread as the eerie, brutal Freddy Krueger attacks unpredictably from every direction.

4) Gakkō no Kaidan (Haunted School) (NEW)

This famous Japanese horror series will appear at the popular Universal Cinema 4-D attraction. Guests will witness familiar stories unravel from the world of *Gakkō no Kaidan (Haunted School)*, including Hanako, a young girl who haunts school bathrooms, and Kuchisake-onna, a malicious spirit with a slit mouth. The video and seats are linked, with special effects to create an eerie phenomenon with an astonishing sense of realism.

5) Trauma: The Experimental Hospital Ward of Horror (NEW)

This terrifying horror attraction has a horror level of 10—the highest in Park history—and was produced with great efforts by Universal Studios Japan. In the past, a psychologist conducted experiments to see how much fear humans can withstand. Now, his facility has been revived. Here, guests will witness many gut-wrenching experiments and are forced to follow erratic instructions from the guards. This attraction is a brand new type of “forced” interactive maze that transcends the fear people have experienced in the past. Only guests who accept the possibility of experiencing mental trauma may participate, and are required to submit a written oath when purchasing a ticket.

* Guests must purchase a ticket to participate in this attraction. For ticket details, please refer to the explanation below.

* The First-day Invitation Campaign, which will allow guests to experience Trauma: The Experimental Hospital Ward of Horror before anyone else, will begin around 3:00 p.m. on July 21 (Tuesday). For details, please visit the official website (www.usj.co.jp).

6) Chucky’s Horror Factory 2 / 7) Biohazard: The Real 3

8) Ju-on: The Cursed Attraction / 9) Sadako: The Cursed Attraction

These popular Halloween Horror Night attractions, which have inspired guests to scream at the top of their lungs, are even scarier this year. At Chucky’s Horror Factory 2, guests are once again made to experience the deepest fear in a derelict toy factory. They feel an extreme sense of urgency that is so real they believe they might be the next to be killed by the brutal Chucky. Biohazard: The Real 3—from which there are no survivors as of yet—continues to boast high popularity. On July 3 (Friday), 2015, it reached its apex with the addition of Production Goggles for the first time in the world. Other attractions include Ju-on: The Cursed Attraction, which is based on the *Ju-on* series of horror movies that were voted as the scariest films in Japan. Sadako: The Cursed Attraction is based on *Sadako*, a movie that even shocked Hollywood. Experience the hair-raising fear when these attractions are transformed into places of horror!
