

Smartphone App for overseas visitors to Japan “TABIMORI – Travel Amulet – “released to provide convenient and comfortable travel in Japan

Tokyo, 30 July 2014: Narita International Airport Corporation (NAA) is pleased to announce the release of a smartphone application on 31 July 2014 with numerous functions that foreign visitors will find useful when they stay in Japan called “TABIMORI - Travel Amulet – ” (or “TABIMORI” for short).

Carrying over the same name given to a portal site released earlier in February 2013, “TABIMORI” is a new smartphone app boasting greatly enhanced contents and high-grade functions that cannot be provided in a website. It caters to the various needs of visitors from abroad when they find themselves in trouble or when they want to check or look something up, while in Japan.

Feature 1 **Multiple functions without internet connection!**

In Japan, free internet access is as yet only available to visitors from abroad at limited locations. Therefore, TABIMORI has a function to allow it to download the latest data when the smartphone is connected to the internet, which can then be used even when the smartphone is offline, as well as a clipping function to store information displayed while online in the cache memory.

This means that, for example, users can get the latest updates on the information they need via the free Wi-Fi at their hotels or other locations, and then browse through the information anytime, anywhere during their trip without having to connect to the internet.

* Offline search functions for the train route search engine will be available from this autumn.

Feature 2 **Information tailored to the needs of foreign visitors to Japan!**

The contents are designed to provide users with a complete solution when they find themselves in trouble or when they want to check or look something up. For more information on the contents, please refer to **◆ Primary Functions ◆** on the next page.

Feature 3 **Interlinked with japan-guide.com!**

This app is interlinked with japan-guide.com, the world's No. 1 portal site providing information on Japan for visitors to the country, visited by around 2 million users every month. Latest tourism information can be obtained by accessing the site from the japan-guide.com section within TABIMORI, and this can then be browsed offline using the clipping function.

* Please refer to the next page for an overview of the application.

◆ Overview of the Application ◆

- ◇ Application name: TABIMORI - Travel Amulet -
- ◇ Applicable Languages: English, simplified and traditional Chinese, Korean, Japanese
- ◇ Compatible devices and operating systems:

Terminal	Applicable OS	Release date
Android	Android 4.0 ~	31 July ~
iPhone iPad	iOS 6.0 ~	31 July ~

- ◇ How to get: Please download from App Store or Google Play
- ◇ Cost: Free of charge

- * Please note that telecom charges associated with downloading and using the application are the responsibility of the user.
- * Android and Google Play are trademarks or registered trademarks of Google Inc.
- * iOS is a trademark or registered trademark of Apple Inc. in the US and other countries.

◇ Primary Functions:

Life and Culture 	Introduces how to use public transport, hotels and ryokans (Japanese-style inns); useful shopping and dining information; and facts about traditional Japanese culture
Transfer Guide (English and Japanese only) 	Train transfer information search based on average traveling times in collaboration with HyperDia (provided by Hitachi Solutions). *Offline search services to be released this autumn.
Emergency Manual 	Explains initial response and evacuation actions in the event of an earthquake, using easy-to-understand illustrations. Also provides essential information, including a list of emergency contact points and sources of information.
Currency Converter 	Currency conversion and calculation between the yen and 34 currencies, using the latest exchange rates.
WeatherForecast 	Three-hourly and weekly weather forecasts for regions across Japan.
Phrase Book 	Contains a wide range of essential everyday phrases to be used while in Japan. In addition to phrases for emergency situations, shopping and dining, there are also useful contents for customers traveling with children and those with disabilities.

<p>Tourism information</p> 	<p>Linked to japan-guide.com, a popular information site for foreigners visiting Japan. A page that has been opened once will be clipped inside the smartphone, so that it can be viewed later at any time from any location without the internet connection.</p>
<p>Free Wi-Fi Guide</p> 	<p>In collaboration with Japan Connected-free Wi-Fi (provided by NTT-BP), once users register their details on the app, they will no longer need to repeat the tedious user registration formalities for free Wi-Fi every time they enter a coverage area. This service also enables users to easily search for free Wi-Fi areas.</p>

: Available offline without the internet connection.

: A page that has been opened once will be clipped inside the smartphone and may be viewed without the internet connection.

: Need the Internet connection.
